RAM Mount Installation

WITH Mounting Plate

1. Use mounting plate or ball mount as drilling template. Mark hole locations with a pen.

2. Drill holes using 13/64” or 5mm drill bit.

3. Use pan head screws, split washers, and nuts to secure mounting plate or ball mount to panel.

4. Attach second mounting plate with ball mount to ClearNav with short nylon standoffs

5. Tighten RAM arm to both ball mounts.

Without Mounting Plate
