CN II Factory Updater Drive

Instructions To Update Your Current CN II Factory Updater Drive For CN II Software Upgrade to v3.0.2.17

NOTE: This software is only for use with the ClearNav II !!!

(Use ClearNav Software v. 2.2.0.73 for the original ClearNav)

1) Download and unzip the software to a convenient place, like your PC.
2) Plug your CN II Factory Updater USB Drive that you received with your CN II into your PC.
3) Delete your current **Program Files** folder and replace it with the new **Program Files** Folder.
4) Delete the **ClearNavUpdater.cnx** file and replace it with the new **ClearNavUpdater.cnx** file.
5) Copy the **FlarmNet** folder to your Updater drive.

If desired, acquire the FlarmNet database and place it in the **FlarmNet** folder.

The database can be downloaded from here-- http://flarmnet.org/index.php/en/downloads . You want the "XCSoar, WinPilot, ……. FlarmNet File"

You can update your CN II anytime by inserting your updated drive into the CN II and turning it on; check the appropriate boxes and click on Update.
